COVID-19 UPDATE

**SOUTH JEFFERSON PHYSICAL THERAPY IS OPEN!!
We are taking the COVID-19 situation very seriously.**

The health and wellness of both our clients and our staff are very important to us and therefore we are taking extra precautions to keep us all safe.

- ***Precautions in the clinic:***

- A few extra measures that we have been taking to keep everyone safe are: asking patients to wash hands upon entering, requesting that family members do not join you during your visit in the clinic, checking patient temperatures, adjusting patient scheduling, maintaining social distancing within the clinic with other patients and of course taking extra measures to keep all equipment sanitized between patients, just to name a few.

- ***Patient's who should not come to therapy:***

- During this time we are also encouraging patients who are at risk or uncomfortable attending physical therapy to please stay home. Please do not come to physical therapy if you have any symptoms involving any type of illness, such as a cough, fever or shortness of breath, have been ill in the last 2 weeks, been in contact with anyone testing positive with the Corona Virus, or you care or live with someone at risk.

- ***Telehealth/ E-visits:***

- For any current patients who would like to continue their visits at home have an option to reach out to us and request an E-visit. Please call our office to set up your E-visit appointment.
